

FocusFlow Authorization

Manual Test Case Document

Workspace • Projects • Teams • Tasks • WorkLog • Collaboration

Document purpose	Manual verification of FocusFlow authorization after the 9-phase authorization migration
Test environment	Authorization Test Workspace A / Authorization Test Workspace B
Primary roles	Owner, Admin, Member
Scoped relationships	Project Manager, Project Member, Team Leader, Team Member, Task Assignee, Reviewer

1. How to Use This Document

- Execute the test cases manually using the seeded authorization users.
- Record the actual result and mark the status as PASS or FAIL.
- For every important authorization decision, capture a screenshot of the UI state. For API/security tests, also capture the request/response from DevTools → Network when applicable.
- Do not perform destructive actions such as deleting the test workspace unless the test explicitly says to use a safe disposable record.
- If a test fails, do not immediately change the code. Record the failure, screenshot, user, resource, request, and observed behavior first.
- A hidden/disabled button is not sufficient proof of authorization. Where possible, verify the backend rejects unauthorized direct requests as well.

2. Seeded Test Users

User	Workspace Role	Workspace	Scoped Relationship
ff-owner-01	Owner	Workspace A	Primary owner testing
ff-owner-02	Owner	Workspace B	Cross-workspace owner isolation
ff-admin-01	Admin	Workspace A	Primary admin testing
ff-admin-02	Admin	Workspace B	Second workspace admin
ff-member-01	Member	Workspace A	Project Alpha / Team Alpha
ff-member-02	Member	Workspace A	Project Alpha / Team Alpha / task assignee
ff-member-03	Member	Workspace A	Project Beta / Team Beta
ff-member-04	Member	Workspace B	Cross-workspace isolation
ff-pm-01	Member	Workspace A	Project Alpha Manager
ff-pm-02	Member	Workspace A	Project Beta Manager
ff-tl-01	Member	Workspace A	Team Alpha Leader
ff-tl-02	Member	Workspace A	Team Beta Leader

3. Test Data Map

- Workspace A contains Project Alpha and Project Beta.
- Project Alpha → PM: ff-pm-01; members: ff-member-01, ff-member-02, ff-tl-01.
- Project Beta → PM: ff-pm-02; members: ff-member-03, ff-tl-02.
- Team Alpha → Leader: ff-tl-01; members: ff-member-01, ff-member-02.
- Team Beta → Leader: ff-tl-02; members: ff-member-03.
- Workspace B is intentionally separate and contains ff-owner-02, ff-admin-02 and ff-member-04.
- Tasks include Alpha-1 assigned to ff-member-01, Alpha-2 assigned to ff-member-02, Beta-1 assigned to ff-member-03, and Beta-2 assigned to ff-tl-02.

4. Screenshot Method

Each test case contains a dedicated Screenshot / Evidence area. Paste the screenshot directly inside that area in Word. For tests with multiple screenshots, use the numbered evidence slots (Evidence 1, Evidence 2, etc.).

5. Manual Authorization Test Cases

Run these cases in order. The sequence moves from broad workspace permissions into scoped project/team/task permissions, then WorkLog and collaboration, and finally direct API/security checks.

5.1 Workspace Authorization

AUTH-WS-001 — Owner can access Workspace A

Objective	Verify basic owner access.
Test User	ff-owner-01
Preconditions	User is logged in and is Owner of Workspace A.
Expected Result	All workspace resources load successfully and no authorization error is shown.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Workspace A from the workspace switcher.
2. Open the workspace home/dashboard.
3. Open the member list.
4. Open the project list.
5. Open the team list.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-002 — Owner can access workspace settings

Objective	Verify Owner settings access.
Test User	ff-owner-01
Preconditions	User is Owner of Workspace A.
Expected Result	Owner can view and edit permitted workspace settings and sees owner-only controls.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Workspace Settings.
- 2. Verify settings controls are visible.
- 3. Open the member-management section.
- 4. Verify owner-level controls are present without executing destructive actions.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-003 — Admin can manage workspace members

Objective	Verify Admin member-management authority.
Test User	ff-admin-01
Preconditions	User is Admin in Workspace A.
Expected Result	Admin can manage Member/Admin assignments according to policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Workspace A.
- 2. Open Members.
- 3. Attempt a safe role change on a test Member, or open the role control if a non-destructive verification is sufficient.
- 4. Verify the UI permits the operation.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-004 — Admin cannot perform Owner-only actions

Objective	Verify Owner boundary.
Test User	ff-admin-01
Preconditions	User is Admin in Workspace A.
Expected Result	Owner-only actions are unavailable or rejected with 403.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open workspace settings.
- 2. Locate ownership transfer and workspace deletion controls.
- 3. Do not execute either action.
- 4. If the UI exposes a direct action, attempt it only against a disposable resource or verify via a safe API request.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-005 — Member can view workspace

Objective	Verify normal workspace access.
Test User	ff-member-01
Preconditions	User is Member of Workspace A.
Expected Result	Member can access the workspace and permitted read-only views.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Workspace A.
- 2. Open workspace home.
- 3. Open members, projects and teams where viewing is allowed.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-006 — Member cannot manage workspace members

Objective	Verify Member management boundary.
Test User	ff-member-01
Preconditions	User is Member of Workspace A.
Expected Result	Member cannot change roles, add/remove members, or otherwise manage membership. Direct API attempt returns 403.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Members.
2. Check for role-management controls.
3. If an API action is available, attempt a role update through DevTools.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-007 — Member cannot edit workspace settings

Objective	Verify settings boundary.
Test User	ff-member-01
Preconditions	User is Member of Workspace A.
Expected Result	Settings are unavailable/disabled or backend returns 403.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Navigate directly to Workspace Settings.
- 2. Attempt to edit a setting.
- 3. If possible, submit the request through the UI.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WS-008 — Workspace A user cannot access Workspace B resources

Objective	Verify cross-workspace isolation.
Test User	ff-member-01
Preconditions	User belongs only to Workspace A.
Expected Result	Access is denied; backend returns 403/404 according to the application's security convention.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt to open Workspace B using its URL/ID.
- 2. Attempt to open a Workspace B project/task if an ID is known.
- 3. Observe UI and network response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.2 Project Authorization

AUTH-PRJ-001 — Project Manager can manage assigned project

Objective	Verify PM-scoped authority.
Test User	ff-pm-01
Preconditions	ff-pm-01 is Member of Workspace A and PM of Project Alpha.
Expected Result	Project Manager can edit Project Alpha within the permitted PM scope.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Project Alpha.
2. Open project settings/info.
3. Edit a safe project field such as description.
4. Save the change.
5. Verify the change persists.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-PRJ-002 — Project Manager cannot manage another project

Objective	Verify project isolation.
Test User	ff-pm-01
Preconditions	ff-pm-01 manages Project Alpha but not Project Beta.
Expected Result	Access/edit is denied for Project Beta where PM authority is required.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Project Beta using navigation or direct URL.
- 2. Attempt to edit project metadata.
- 3. If possible, attempt the PATCH request directly.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-PRJ-003 — Project Member can access assigned project

Objective	Verify project-member access.
Test User	ff-member-01
Preconditions	ff-member-01 belongs to Project Alpha.
Expected Result	Project Member can access permitted Project Alpha resources.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Project Alpha.
- 2. View project information.
- 3. Open permitted project task/team views.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-PRJ-004 — Non-member cannot access project-scoped data

Objective	Verify project membership boundary.
Test User	ff-member-03
Preconditions	ff-member-03 is a member of Project Beta, not Alpha.
Expected Result	Unauthorized project-scoped resources are denied.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt to open Project Alpha directly.
- 2. Attempt to view an Alpha task.
- 3. Observe UI and API response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-PRJ-005 — Workspace Admin can manage projects

Objective	Verify Admin override within workspace.
Test User	ff-admin-01
Preconditions	User is Admin of Workspace A.
Expected Result	Workspace Admin can manage projects within Workspace A.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Project Alpha.
- 2. Open project settings.
- 3. Perform a safe edit.
- 4. Save and verify.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-PRJ-006 — Project Manager cannot manage project membership if restricted to workspace admins

Objective	Verify separation between project editing and membership administration.
Test User	ff-pm-01
Preconditions	ff-pm-01 manages Project Alpha.
Expected Result	Action is denied if policy reserves project membership administration for Workspace Owner/Admin.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Project Alpha member management.
- 2. Attempt to add/remove a project member.
- 3. Observe UI/API result.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.3 Team Authorization

AUTH-TM-001 — Team Leader can manage own team

Objective	Verify Team Leader scoped authority.
Test User	ff-tl-01
Preconditions	ff-tl-01 leads Team Alpha.
Expected Result	Team Leader can manage Team Alpha within the defined team scope.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Team Alpha.
- 2. Edit a safe team field such as description.
- 3. Open team member management.
- 4. Perform a safe member-management action if available.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TM-002 — Team Leader cannot manage another team

Objective	Verify cross-team isolation.
Test User	ff-tl-01
Preconditions	ff-tl-01 leads Team Alpha and is not Leader of Team Beta.
Expected Result	Team Beta management is denied.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Team Beta.
- 2. Attempt to edit team information.
- 3. Attempt member management.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TM-003 — Team Member can view own team

Objective	Verify normal team access.
Test User	ff-member-01
Preconditions	User is a member of Team Alpha.
Expected Result	Team details are visible according to policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Team Alpha.
2. View team details and members.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TM-004 — Non-team user cannot perform team-leader actions

Objective	Verify leader boundary.
Test User	ff-member-03
Preconditions	User is not a member/leader of Team Alpha.
Expected Result	Team management is denied.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Team Alpha if visible.
- 2. Attempt a team management action.
- 3. Observe response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TM-005 — Workspace Admin can manage teams

Objective	Verify Admin team authority.
Test User	ff-admin-01
Preconditions	User is Admin of Workspace A.
Expected Result	Admin can manage teams in Workspace A.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Team Alpha.
2. Edit a safe field.
3. Verify member-management controls are available.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.4 Task Authorization

AUTH-TASK-001 — Assignee can update assigned task

Objective	Verify task assignee permissions.
Test User	ff-member-01
Preconditions	ff-member-01 is assigned Task Alpha-1.
Expected Result	Assignee can update only fields permitted by the task policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Task Alpha-1.
2. Change a permitted field such as status.
3. Save.
4. Refresh and verify the change.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TASK-002 — Assignee cannot change protected task ownership

Objective	Verify field-level authorization.
Test User	ff-member-01
Preconditions	ff-member-01 is assigned Task Alpha-1.
Expected Result	Protected fields are rejected or ignored for an assignee; unauthorized API request returns 403.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Task Alpha-1.
- 2. Attempt to change project/team/ownership fields if exposed.
- 3. If possible, send a direct PATCH containing a protected field.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TASK-003 — Project Manager can manage project tasks

Objective	Verify PM task authority.
Test User	ff-pm-01
Preconditions	ff-pm-01 manages Project Alpha.
Expected Result	Project Manager can perform the task operations allowed by policy within Project Alpha.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Task Alpha-1.
- 2. Edit a permitted task field.
- 3. Attempt assignment/reviewer update if policy allows.
- 4. Save.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TASK-004 — Unrelated project user cannot edit task

Objective	Verify cross-project task isolation.
Test User	ff-member-03
Preconditions	User belongs to Project Beta, not Project Alpha.
Expected Result	Task access/edit is denied where user has no permitted relationship.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Task Alpha-1 directly.
- 2. Attempt to change status or description.
- 3. Observe response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TASK-005 — Workspace Admin can manage workspace tasks

Objective	Verify Admin task authority.
Test User	ff-admin-01
Preconditions	User is Admin of Workspace A.
Expected Result	Admin can manage the task according to policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open a task in Workspace A.
- 2. Perform a safe task edit.
- 3. Verify persistence.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-TASK-006 — Task assignment respects project/team boundaries

Objective	Verify assignment does not bypass scope.
Test User	ff-member-01
Preconditions	User is a Project Alpha member.
Expected Result	Invalid assignment is rejected.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Attempt to assign Task Alpha-1 to a user who is not an eligible project/workspace member, if UI/API supports this.
2. Observe validation.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.5 WorkLog Authorization

AUTH-WL-001 — User can create own WorkLog

Objective	Verify basic WorkLog creation.
Test User	ff-member-01
Preconditions	User has access to a workspace task.
Expected Result	WorkLog is created successfully for the authorized user/task.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open WorkLog.
- 2. Create a WorkLog linked to an allowed task.
- 3. Save it.
- 4. Verify it appears in the user's WorkLog.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-002 — User can edit own WorkLog

Objective	Verify ownership.
Test User	ff-member-01
Preconditions	User owns an existing WorkLog.
Expected Result	Own WorkLog can be edited.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open the WorkLog.
- 2. Edit a safe field.
- 3. Save.
- 4. Refresh.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-003 — User cannot edit another user's WorkLog

Objective	Verify WorkLog ownership boundary.
Test User	ff-member-02
Preconditions	A WorkLog owned by ff-member-01 is available in Workspace A.
Expected Result	Unauthorized edit is rejected.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open the other user's WorkLog if visible through an authorized team/project view.
- 2. Attempt to edit it.
- 3. If possible, attempt direct PATCH.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-004 — Team Leader can view team WorkLogs

Objective	Verify team-scoped visibility.
Test User	ff-tl-01
Preconditions	ff-tl-01 leads Team Alpha.
Expected Result	Team Leader can view permitted team WorkLogs.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open Team Alpha WorkLog view.
2. Review worklogs belonging to Team Alpha members.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-005 — Project Manager can view project WorkLogs

Objective	Verify project-scoped visibility.
Test User	ff-pm-01
Preconditions	ff-pm-01 manages Project Alpha.
Expected Result	Project Manager can view permitted project WorkLogs.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open Project Alpha WorkLog view.
- 2. Review worklogs linked to Project Alpha.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-006 — Member cannot view unrelated team WorkLogs

Objective	Verify WorkLog isolation.
Test User	ff-member-03
Preconditions	User belongs to Project/Team Beta and is not a leader of Team Alpha.
Expected Result	Access is denied.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt to open Team Alpha WorkLogs.
- 2. Observe response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-007 — User cannot approve own WorkLog

Objective	Verify approval separation.
Test User	ff-member-01
Preconditions	User has a submitted WorkLog.
Expected Result	Self-approval is rejected.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open own submitted WorkLog.
2. Attempt to approve it.
3. Observe result.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-WL-008 — Authorized reviewer can approve submitted WorkLog

Objective	Verify approval workflow.
Test User	ff-tl-01
Preconditions	A Team Alpha member has a submitted WorkLog and ff-tl-01 is authorized to review it.
Expected Result	WorkLog changes to approved according to policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open the submitted WorkLog.
- 2. Review it.
- 3. Approve it.
- 4. Verify status changes.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.6 Collaboration Authorization

AUTH-COL-001 — Workspace member can create discussion

Objective	Verify discussion creation.
Test User	ff-member-01
Preconditions	User is a Member of Workspace A.
Expected Result	Discussion is created successfully.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open an allowed project/task collaboration area.
2. Create a discussion.
3. Post it.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-002 — Workspace member can comment

Objective	Verify comment creation.
Test User	ff-member-02
Preconditions	User has access to the target discussion/resource.
Expected Result	Comment is created successfully.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open an allowed discussion.
2. Add a comment.
3. Verify it appears.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-003 — Author can delete own comment

Objective	Verify resource ownership.
Test User	ff-member-01
Preconditions	User has created a comment.
Expected Result	Own comment is deleted.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open the comment menu.
2. Choose delete.
3. Confirm if prompted.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-004 — Member cannot delete another user's comment

Objective	Verify comment ownership boundary.
Test User	ff-member-02
Preconditions	A comment belongs to ff-member-01.
Expected Result	Deletion is unavailable or rejected.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open the comment if visible.
- 2. Attempt to delete it.
- 3. Observe UI/API response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-005 — Admin can moderate collaboration resources

Objective	Verify Admin moderation authority.
Test User	ff-admin-01
Preconditions	User is Admin of Workspace A.
Expected Result	Admin can perform actions allowed by collaboration policy.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open an allowed discussion/comment resource.
2. Verify permitted moderation controls.
3. Perform only a safe moderation action.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-006 — Unauthorized user cannot access unrelated collaboration resource

Objective	Verify parent-resource authorization.
Test User	ff-member-03
Preconditions	Target collaboration resource belongs to Project Alpha; user belongs to Project Beta.
Expected Result	Access is denied.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Open the Alpha collaboration resource directly.
- 2. Attempt to comment or manipulate it.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-COL-007 — Attachment deletion respects ownership/role policy

Objective	Verify attachment authorization.
Test User	ff-member-01
Preconditions	An attachment exists in an accessible collaboration resource.
Expected Result	Own-resource action succeeds; unauthorized deletion is rejected.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt to delete own attachment if supported.
- 2. Attempt to delete another user's attachment if available.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

5.7 Security / Direct API / IDOR Tests

AUTH-SEC-001 — Member cannot escalate own role to Admin

Objective	Verify vertical privilege escalation prevention.
Test User	ff-member-01
Preconditions	User is Member of Workspace A.
Expected Result	Backend rejects the request with 403/validation error and role remains Member.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open DevTools → Network.
2. Perform or capture the member-role update request.
3. Attempt to change own role to Admin by modifying the request payload.
4. Send the request.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-002 — Member cannot assign Owner role

Objective	Verify Owner protection.
Test User	ff-member-01
Preconditions	User is Member of Workspace A.
Expected Result	Backend rejects the request; no Owner role is created/assigned.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Modify a role-assignment request to use Owner.
- 2. Send the request.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-003 — Project Alpha user cannot access Project Beta by changing project ID

Objective	Verify IDOR prevention.
Test User	ff-member-01
Preconditions	User has access to Project Alpha but not Project Beta.
Expected Result	Backend denies access; no Beta data is returned or modified.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

1. Open an authorized Alpha API request in DevTools.
2. Copy the request.
3. Replace the project ID with Project Beta ID.
4. Send the request.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-004 — Team Alpha leader cannot access Team Beta by changing team ID

Objective	Verify team IDOR prevention.
Test User	ff-tl-01
Preconditions	User leads Team Alpha only.
Expected Result	Backend denies the request.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Capture an authorized Team Alpha request.
- 2. Replace team ID with Team Beta ID.
- 3. Send it.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-005 — Workspace A user cannot access Workspace B by changing workspace ID

Objective	Verify cross-workspace IDOR prevention.
Test User	ff-member-01
Preconditions	User belongs only to Workspace A.
Expected Result	Backend denies access.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Capture a Workspace A request.
- 2. Replace workspace ID with Workspace B ID.
- 3. Send it.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-006 — Project Manager cannot elevate to workspace Admin

Objective	Verify scoped relationship does not become role authority.
Test User	ff-pm-01
Preconditions	ff-pm-01 is a workspace Member and Project Alpha PM.
Expected Result	Backend rejects the operation.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt to access workspace member role-management endpoint.
- 2. Attempt to change a user's workspace role.
- 3. Observe response.

Evidence / Screenshots

EVIDENCE 1 — PASTE SCREENSHOT HERE

EVIDENCE 2 — PASTE SCREENSHOT HERE

Actual Result:

Notes / Defect Reference:

AUTH-SEC-007 — Team Leader cannot elevate to workspace Admin

Objective	Verify team relationship boundary.
Test User	ff-tl-01
Preconditions	ff-tl-01 is a workspace Member and Team Alpha Leader.
Expected Result	Backend rejects the operation.
Status	☐ PASS ☐ FAIL ☐ BLOCKED

Steps

- 1. Attempt workspace member role-management operation.
- 2. Attempt to assign Admin role.
- 3. Observe response.

6. Final Review Checklist

- ☐ All Owner workspace tests completed.
- ☐ All Admin workspace tests completed.
- ☐ All Member workspace tests completed.
- ☐ Project Manager scope verified.
- ☐ Project Member scope verified.
- ☐ Team Leader scope verified.
- ☐ Team Member scope verified.
- ☐ Task Assignee permissions verified.
- ☐ Task field-level restrictions verified.
- ☐ Personal WorkLog ownership boundary verified.
- ☐ Team/project WorkLog visibility verified.
- ☐ WorkLog approval/self-approval boundary verified.
- ☐ Discussion/comment/attachment authorization verified.
- ☐ Cross-project isolation verified.
- ☐ Cross-team isolation verified.
- ☐ Cross-workspace isolation verified.
- ☐ Vertical privilege escalation tested.
- ☐ Horizontal privilege escalation/IDOR tested.
- ☐ UI restrictions and backend restrictions both verified.
